PROFILE

Salesforce Administrator | Certified Admin

Sales Cloud | Test Script Design | UAT / SIT | Flows | Reports & Dashboards | Provar (Basic)

Salesforce Administrator with 3 years of experience supporting Sales Cloud and Service Cloud, including CPQ and Model N-integrated workflows, migration projects, configuration, reporting, and release support. Strong hands-on expertise in user management, CRM data validation, reports & dashboards, and Salesforce configuration, along with SIT and UAT testing for Sales Cloud, Service Cloud, CPQ, and Model N processes. Experienced in test script design, defect validation, and release verification, collaborating closely with business and technical teams to ensure CRM integrity and stable deployments.

EDUCATION

BHARATH UNIVERSITY

B.Tech in Computer Science and Engineering - 8.9/10 CGPA

2019 – 2023

Chennai, India

PROFESSIONAL EXPERIENCE

Packaged App Development Associate – Salesforce Admin & QA

Salesforce Administrator – Vantive Migration Project (Present)

- Supported Salesforce migration from legacy systems to Sales Cloud, including data validation, reconciliation, and sanity checks for migrated Accounts, Contacts, Leads, and Opportunities.
- Managed user setup, profiles, roles, and permission sets; assisted with configuration of custom fields, page layouts, validation rules, and flows.
- Created and validated reports and dashboards to verify migrated data accuracy and provided post-migration user support and issue resolution.

Salesforce Administrator & QA Support – Baxter Project

- Supported Salesforce administration activities such as configuration updates, metadata changes, user access management, and object validation.
- Ensured CRM data integrity during release and testing cycles and assisted in documenting Salesforce processes and configurations.
- Executed functional, regression, and UAT testing for Sales Cloud, Service Cloud, CPQ, and Model N-integrated Salesforce workflows, validating Leads, Accounts, Opportunities, Cases, pricing logic, and downstream integrations.
- Logged and tracked defects in JIRA, coordinated with developers for resolution, and supported deployment validation and post-release verification.
